Description

Our goal with the latest edition of the Ibis Mojo was to use the best in technologically advanced design, engineering, materials and construction to bring you (and us!) an elegant and efficient ride suitable for a wide variety of terrain and conditions. Follow the links below for more information about the Mojo Carbon, its technology and our objectives in building it.

For those of you with A.D.D. (now it's officially called AD/HD) here is the quick down and dirty info:

Features of the Mojo Carbon

- Carbon monocoque frame and swing arm
- 5.5" (140mm) rear wheel travel
- DW-Link Suspension
- Forged and nickel-plated links
- Easy to service pivots and bearings
- Lightweight (sub 6 lb) frame, swingarm, rear shock; 25 lb complete bike weight

MRRP 8480 (Frame & Rear shock)
