Description

Fast Forward a full carbon wheel set with the benefits of clincher wheels! With a low profile of 24,5mm these wheels are perfect for climbing but have offer also a fantastic feel on flat roads.

The wheels are technically able to handle riders over 100kg just like all our models. However not all terrains are suitable for every rider when it comes to Full Carbon Clincher wheels. Depending on the combination of factors like rider weight, terrain and intensity the best suitable wheel set can be chosen.

Like all carbon FFWD wheels, the brake surface of the FCC wheel sets has a special top layer. One of the key features of the special layer is that the braking performance is almost equal to braking on alloy, also in wet conditions!

MRRP RM 3380.00 Per Pair.

(9 to 11 Speed)
