Description

The Micro Drive front light is equipped with 150 lumens and is lightweight yet durable, due to being constructed out of CNC machined aluminum. The Micro Drive features side cuts which increases visibility. The Intelligent Power indicator button allows the user to check the power level at any time. The Composite matrix end cap conceals the integrated USB stick for cable- free recharging of the Li-ion battery (non- replaceable). The Micro Drive features a snap- fit Composite Matrix which allows you to fit the light on multiple diameter handlebars. The silicon rubber strap allows tool- less installation.
