Manufacturer: Fizik

Description

Zea:k unique shape and featueres are specifically designed for MTB bikes with suspension travel from 140 to 180mm - All-Mountain use: 1)multi-seating positions
2)rear soft zone

Zea:k positioning system naturally mirrors changing terrain and pitch, placing the rider in the best position:

- -the nose is well padded with "squared section" for extra lateral grip, more comfort and increase traction during steep climbs
- -the rear seating zone, flatter and wider, is the ideal surface to distribute your weight uniformly.

The **rear zone**, softly rounded, is designed to reduce pain in case of impact.

The mainframe protects your Zea:k for 270°, and will facilitate your "job" when carrying your bike on
